

Manage mosquito populations around your property

Drain anything that can hold over an inch of standing water

Stop puddles from forming near faucets, gutters, and drains

Always cover trash containers and recycling bins

Keep your grass mowed, especially around high use areas

Fill in any tree holes or stumps with sand

Get rid of any tires or other items that can hold water

Keep trees and shrubs trimmed to reduce hiding places

Avoid leaving piles of leaves, grass, or wood around your property

Treat your property with mosquito barrier protection from us!
